

Accessing GroupWise WebMail Using AOL

- AOL has a unique way of loading and “caching” Webpages that makes it incompatible with GroupWise WebMail.
 - You must use an Internet Browser that did NOT come with your AOL setup kit.
 - You may use a version of Internet Explorer that was not included with AOL, but AOL’s Internet Explorer will NOT work.
 - One option might be to download Firefox at www.getfirefox.com. Firefox is relatively east to install. Installing Internet Explorer is a slightly bigger project.
 - Once you have another available Internet Browser, follow these instructions:
1. Log on to the Internet with AOL and then **minimize** your AOL window.  window.
 2. Open a Web browser that is NOT associated with AOL (eg., Firefox)
 3. Visit <http://groupwise.slcsud.org>.
 4. You now should be able to log on and use your GroupWise Webmail.
