

# Looking up a Student's Novell Username and Password on PowerSchool

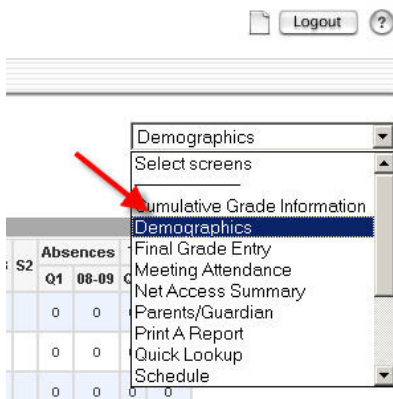

1. Log in to PowerSchool and click on the backpack next to the student's class.

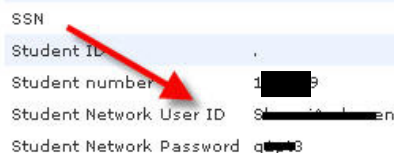

2. Click on the student whose Novell password you need to look up.

3. Select the **Demographics** Screen from the drop-down menu.

4. That student's Novell computer network username and password are both located near the bottom of the screen.

5. If you click on a different student's **first name**, you will be shown the same Demographics page for that student. Clicking on a student's **last name** always gives you their default screen. You may change the default screen by clicking **Personalize**. I recommend using the Quick Lookup screen as the default.
